Submissions Deadlines

Methods and Strategies in Business Information, in Big Data, as well as in Domain Data and Knowledge collection all share an important issue to deal with, that is the one of bringing up an adequate and comprehensible visualization approach to present relevant information to users and decision-makers in an effective way. This special issue collects some recent approaches of DSS and of Information Systems that present domain-specific and visualization-based user communication strategies and interfaces to support decision-making. After the ICDSST 2017, qualified extended papers presented during the International Conference on DSS Technology 2017 in Namur, Belgium (ICDSST 2017), will be invited by the Guest Editors to be reviewed for this special issue. Authors of invited papers should submit their extended work to the [Lead Guest Editor](#). After the submission, a peer review process will then be engaged and a selection of the best papers will be published.

All manuscripts should be written according to the Springer OR Journal's Guidelines for Authors:
<http://www.springer.com/business+%26+management/operations+research/journal/12351?detailsPage=editorialBoard>

Important Deadlines:

<i>Deadline for full paper submission:</i>	<i>September 30th, 2017</i>
<i>Notice of acceptance/rejection:</i>	<i>December 15th, 2017</i>
<i>Revised paper submission:</i>	<i>February 15th, 2018</i>
<i>Final decision:</i>	<i>March 15th, 2018</i>
